Election/Restrictions

Applicant's election without traverse of Group II, Claims 15-32 in the reply filed on 5-9-2003 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites the limitation "the balloon" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15, 16, 18, 20-23 and 25-30, rejected under 35 U.S.C. 102(b) as being clearly anticipated by Moorman et al.(U.S.Pat.5,651,047).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3742

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moorman in view of Schoolman(U.S.Pat.5,493,595). Moorman discloses a maneuverable and locatable catheters that shows many of the feature of the claimed invention but fails to explicitly show radiopharmaceuticals in a body lumen. Schoolman discloses a stereoscopically displayed three dimensional medical imaging system that explicitly shows radiopharmaceuticals. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to obtain a gross count of radiopharmaceuticals the tend to concentrate in body organs.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moorman in view of Cheng(U.S.Pat.6,801,648). Moorman fails to explicitly show a resolution of 1-3mm. Cheng discloses an optical imaging system with symmetrical optical probe that explicitly shows a 1-3 mm. Resolution. It would have been obvious to Moorman to use a resolution of 1-3 mm. because the resolution woul match the sensitivity of the equipment available at the time.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Popilock, Bishop, Rayylman, DiFilippo and Gagnon are cited to show structure and methods similar to the claimed invention.

Allowable Subject Matter

Claims 24 and 30-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
